## VOC PACKING TYPE " CP21 "

KUKIL INNTOT is a professional manufacturer of gasket, packing coupling with the latest technology not only for the plant but also the plant maintenance and emergency repair.

### Product Reference :

K/# VOC-CP21

### Description :

VOC-CP21 is suitable for cryogenic use and is manufactured in the same Cup & Cone structure as VOC-HP21, and is composed of PTFE braid packing and Graflex + PTFE Die Mold. PTFE is formed on the outside, so it can be used for cryogenic temperatures and various fluids, and Graflex is located inside, so it has effective performance against cushion action and the impact of the stem. It is manufactured in a Cup & Cone structure so that the force is evenly distributed between the top and bottom, inside and outside diameter when installed, so it can have excellent sealing even at low clamping pressure and can be used for a long time.

### Service :

Maximum recommended Temperature : -240 ~ 250°C  
Maximum recommended Pressure : Class 150LB ~ 2500LB

### Construction :

### Applications :

Steam & Water.  
Gases & LNG.  
Hydrocarbon & Oil.  
Heat medium.  
Organic solvents.  
Volatile organic compounds.  
Extremely low temperature fluids.  
etc.

### Availability :

Gasket Size : Order based  
Thickness : Order based

### Remark :

- The specification of product is written by manufacturer, and it is changed frequently.
