KUKIL INNTOT is a professional manufacturer of gasket, packing coupling with the latest technology not only for the plant but also the plant maintenance and emergency repair.

Product Reference :

K/# EB

Description :

Ebilon Gasket are able to be installed with small stress to the flanges and it is suitable for the industries which high cleanness is desired such as Electronics, Foods, Pharmacy. The surface of Rubber have 2 projection and it made better sealing effect than the Rubber Flat Sheet Gasket and it made excellent sealing effect with lower installation torque.

Especially, it is ideal for the flanges made of Plastic such as PVC, CPVC, FRP, PVDF, Polypropylene.

Service :

Maximum recommended Temperature : -30 ~ 150°C

Maximum recommended Pressure : 20 Kg/cm²

Construction :

PTFE(inside) + Rubber(outside)

Gasket Design Data :

Gasket Factor " m "	Min. Design Sealing Stress " y "
2	400 psi

Availability :

Gasket Size : Max. Ø3000

Thickness : 5mm, 6mm, etc.

Remark :

- The specification of product is written by manufacturer, and it is changed frequently.
- Non-seam work is available only for those whose out-diameter is 1000mm or below.
- The recommended flange surface finish is 125~500AARH
